

TRAMPING / HUNTING / FIELDWORK

IFAK V2

INDIVIDUAL FIRST AID KIT

Trauma essentials, organised for quick access.

\$345.50 incl. GST

Personal trauma essentials for the outdoors

Designed by KT Services for hunting, tramping and outdoor work, the IFAK v2 is a compact individual trauma kit for situations where prompt access to first-aid supplies matters. It opens out for a clear view of the kit, with a pre-staged CAT Gen 7 tourniquet and trauma essentials in the main section. A removable, tearaway insert keeps minor-aid items close at hand. Selected dressings and soft supplies are sealed in a heavy-duty Vac Pac to help protect against moisture and contamination until opened. For hunters, rural workers, 4WD travellers and backcountry adventurers, its compact format keeps targeted trauma supplies close by. The Elite Bags pouch can attach via its MOLLE panel or thigh straps to clothing, a belt or pack; choose a secure position that keeps the kit accessible as you move.
