

VEHICLE / ROAD / OUTDOOR

CAR TRAUMA KIT

Ready for the road.

\$435.50 incl. GST

Trauma supplies, ready to access from the car

Designed to hang from a vehicle headrest, this kit keeps first aid supplies close at hand while travelling. KT Services recommends mounting it on the passenger-side headrest so the driver can reach it.

The quick-pull-open pouch brings together supplies for a serious bleed, other wounds and moderate injuries involving more than one person while further help is on the way.

KIT CONTENTS

Celox sachets

For smaller bleeds.

Celox applicator

For packing puncture wounds.

BPC 15 dressing

A standard dressing for a large wound.

SWAT-T tourniquet

For smaller limbs where a CAT may not fit.

Large shears

For cutting clothing to access an injury.

Z-fold gauze

For packing deep wounds, when used by someone trained.

T3 emergency bandage

Wound packing plus a second pad for larger wounds.

CAT Gen 7 tourniquet

For controlling serious bleeding from a limb.

Plasters

For minor scrapes.

Cohesive bandage

Helps hold dressings in place.

READY FOR THE ROAD

Mounted on a vehicle headrest

Contents arranged for quick access

HEADREST-MOUNTED Quick-pull access while travelling; passenger side recommended.
