

FORESTRY / ARBORIST / OUTDOOR CUTTING

CHAINSAW FIRST AID KIT

Trauma essentials close to the saw.

\$205.25 incl. GST

Purpose-built for chainsaw and cutting work

Made for forestry, arborist, farm and outdoor cutting work in New Zealand. Keep haemorrhage control and trauma essentials close to the saw, not back at the ute.

Designed for the chainsaw operator or spotter, it contains what is needed to deal with a chainsaw cut while leaving space to add extra items. A general outdoor kit can help, but chainsaw work usually needs dedicated trauma-capable contents close to hand.

KIT CONTENTS

14 cm shears

For cutting clothing to help expose an injury.

10 cm trauma dressing

For covering a wound and supporting pressure application.

Orange CAT tourniquet

For controlling life-threatening bleeding from a limb when required.

Black Sharpie

For recording information, including tourniquet application time.

Packing gauze

For wound packing where appropriate, by someone trained in its use.

Nitrile gloves

For a protective barrier when providing first aid.

ELITE 031 BAG Leg straps | Belt loop | Fast release
